4th Annual Production Sale

Saturday • March 12, 2022

1 pm | Headwaters Livestock Auction Yards | Three Forks, MT

ThousandHillsAngus.com

Friends and fellow beef producers,

The Van Dyken Family would like to invite all of you to our fourth annual production sale. We thank you for your support at our previous sales and look forward to seeing you all on March 12 at Headwaters Livestock in Three Forks, MT. At Thousand Hills, we truly value each friendship and acquaintance we have made over the years. The comradery of beef producers makes it far and away the best business to be in.

The highlight of our year came on April 17 when Otis James joined Andy, Kindle and Jackson and the rest of our family. What a blessing to be able to live the life we love, and have our kids and grandkids working side by side with us. They are the future.

2021 was certainly a tough one for the beef producers in Montana and the surrounding states. We certainly don't need another like it anytime soon. By late April the Temps were in the mid 80s already. Just about the only moisture we got came in the form of snow in late May. And with it came a hard frost that set back the hay. Then the spigot turned off and by early June we were in the mid 90s. And it just kind of stayed that way. Through the drought our cows hung tough and came home with an awesome set of calves.

With every cloud, there is a silver lining. With the reduction in cow numbers, this calf market is about to get really good. I saw a prediction the other day of 6 weight calves bringing well over \$2. And when we get moisture, this female market will be wild. Keep as many cows as you can, maybe bid another time or two to get that bull you really want, and then hold on. This thing is about to get really good.

The breeding program at Thousand Hills is focused on "Maternally Driven Genetics". The bulls we select to use on our cows are chosen for their ability to sire outstanding females, while still having the performance and power needed for today's market. We believe that cows were created to convert grass into good tasting protein. If that cow isn't pregnant, she's not doing what she was created to do, therefore, fertility is at the top of our requirements for our cows. We AI for 21 days and then turn out the bulls. Our goal is a 42 day calving season. Our calves are raised on their mother's milk and grass on mountain pastures. You won't find a creep feeder on our place. We don't tolerate bad dispositions, bad feet, or bad udders. The environment we run in is our best selection tool and the cream always rises to the top.

The bulls were weaned early this year because grass just dried up. We weaned September 7 and turned onto a grass meadow and fed a weaning pellet. On Nov. 22 we brought them to the lot and put them on a high roughage ration. Our goal is to have them developed enough to express their genetic potential and be ready to breed cows in the spring.

Since we have had a few customers who prefer it, this year all the bulls will have a freeze brand. No more ear tag worries.

All our bulls are 100% guaranteed by Thousand Hills. If you have a problem with a bull, let us know. We will make it right.

The bulls are on feed here at home until the 11th of March. If you would like to look at the bulls at a more leisurely pace, we would be happy to have you stop by for a cup of coffee and a stroll through the bull pen.

If you are unable to attend the sale but would like to purchase, the sale will be on DV Auctions. They will need you to preregister for the sale 24 hours in advance. We also have phones available on sale day if you prefer that. Let us know and we will make those arrangements.

This year we partnered with Ron Frye Marketing so if you want an unbiased opinion on the bulls, give Ron a call. (406) 600-7514
Videos of all the bulls are available at: ThousandHillsAngus.com

Look forward to seeing you sale day or any other time,

The Van Dykens

Welcome to The Thousand Hills Angus Annual Bull Sale!

For decades the VanDyken family has been raising high quality registered Angus cattle. Their passion for the purebred industry, ranching, and farming has led them to The Thousand Hills Angus Annual Bull Sale, 2022 edition. I know that the family is especially proud of this set of bulls which features a home raised son of S Chisum 255. TH Gunsmoke 255 will leave his mark on this cow herd. Gunsmoke is a former Thousand Hills sale topper that sired the top two sellers in the 2021 Thousand Hills sale. Look for this outstanding sire to be a cornerstone in this program for years to come.

Bull selection is a very important part of the Thousand Hills program, so when they step out and use a bull A.I. or purchase a bull for use in their herd chances are they've given that individual a lot of thought. How will he fit in their cow herd, which sire group of cows will he complement, and most importantly what kind of females will he leave behind. This program is female driven. Producing females that not only are extremely productive, but breed back and have longevity.

You might attend sales that have a greater volume of bulls, but none with more hospitality or gratitude for you taking time out of your busy schedule to join them on their big day.

If I can be of any assistance as you prepare for this sale, please call or text, It would be my pleasure to visit with you.

Ron Frye

A GUIDE TO EPDS

Expected Progeny Difference (EPD), is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the American Angus Association database. EPDs are expressed in units of measure for the trait, plus or minus.

PRODUCTION

Calving Ease Direct (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight EPD (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight EPD (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Yearling Weight EPD (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Scrotal Circumference EPD (SC), expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

MATERNAL

Maternal Milk EPD (Milk), is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

Heifer Pregnancy (HP), is a selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is the more favorable direction and the EPD is reported in percentage units.

\$VALUE INDEXES

Maternal Weaned Calf Value (\$M), an index, expressed in dollars per head, predicts profitability differences from conception to weaning with the underlying breeding objective assuming that individuals retain their own replacement females within herd and sell the rest of the cull female and all male progeny as feeder calves. The model assumes commercial producers will replace 25% of their breeding females in the first generation and 20% of their breeding females in each subsequent generation. Traits included are as follows: calving ease direct, calving ease maternal, weaning weight, milk, heifer pregnancy, docility, mature cow weight, claw set and foot angle.

Weaned Calf Value (\$W), an index, expressed in dollars per head, to predict profitability differences in progeny due to genetics from birth to weaning. The underlying objective being producers will retain 20% of the female progeny as replacements and sell the rest of the cull females and their male counterparts as feeder calves. Traits included are as follows (in no particular order): birth weight, weaning weight, milk, and mature cow weight.

CARCASS

Marbling EPD (Marb), expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area EPD (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

Fat Thickness EPD (Fat), expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

The top selling bull in our in 2019 sale, and a standout from the day he was born, out of Chisum 255, he's in the top 1% for \$M and 5% for \$W. Along with an impeccable foot and leg structure, his calves are thick with incredible hip and hind quarter. His elite dam, Windy 078 X Hero 2418, is the 3rd consecutive generation to achieve pathfinder status. She is the 8th straight generation to produce 7 or more calves. His daughters are going to make outstanding cows.

+6	+2.7	+66	+125	+7.8	+24	+21.5	+63	+84	+0.13	+0.38	+0.95

We selected this Resource son as the second high seller in the 2020 Pine Coulee sale. We really liked the way he combined the Blackcap May cow with the Everelda Intense cow family into an excellent combination of muscle and mass that extends down through his hip and shoulder. He is easy moving with a wide base, and projects the masculine, timeless look of his sire. His dam recorded 3WR/113 and 2YR/112. He is in the top 1% of the Angus breed for Heifer Pregnancy.

WHY WE TEST WITH HD50K™ FROM ZOETIS

Powered by HD50K™ from Zoetis, our cattle sell with genomic-enhanced expected progeny differences (GE-EPDs).

With GE-EPDs, we're confident that customers like you can minimize risk in their investment — and enhance the productivity of your cattle.

The benefits of buying HD50K-tested bulls and heifers goes beyond added accuracy for the complete range of traits for more productive daughters and progeny. You'll know early on what that animal is likely to transmit to its offspring and potential for performance in the feedlot and on the rail. You can also match the HD50K tested sires you buy from us to replacement heifers — through GeneMax® Advantage™ — to make better-informed breeding and management decisions down the road.

Knowing an animal's potential. Continuous progress of your herd. That's why we test with HD50K.

For more information: Contact your Zoetis representative
 Call Zoetis customer service at 877-233-3362

Commercial Bred Heifers

Lot 47

12 commercial heifers right out of our replacement pen. Bull bred to calve Feb. Ultrasound pregged mid-June by Chuteside Vet. These heifers will be at the ranch sale day. Video of the heifers will be available sale day. If you want to see them we would be happy to make those arrangements.

Service Sire to Heifers
