6th Annual Production Sale

Saturday • March 9, 2024

1 pm | Headwaters Livestock Auction Yards | Three Forks, MT

ThousandHillsAngus.com

Friends and fellow beef producers,

The Van Dyken Family would like to invite all of you to our sixth annual production sale. We thank you for your support at our previous sales and look forward to seeing you all on March 9 at Headwaters Livestock in Three Forks, MT. At Thousand Hills, we truly value each friendship and acquaintance we have made over the years. The comradery of beef producers makes it far and away the best business to be in.

We were blessed with some timely moisture in 2023. It's the first time I can remember our grass being greener at the end of August than it was at the beginning of July. Our bull calves came home looking better than ever. With the reduction in cow numbers, this calf market is about to get really good. Calf prices are predicted to be higher than last year by quite a bit. Keep as many cows as you can, maybe bid another time or two to get that bull you really want, and then hold on. Experts are saying this market should remain strong for several years.

The breeding program at Thousand Hills is focused on "Maternally Driven Genetics". The bulls we select to use on our cows are chosen for their ability to sire outstanding females, while still having the performance and power needed for today's market. We believe that cows were created to convert grass into good-tasting protein. If that cow isn't pregnant, she's not doing what she was created to do, therefore, fertility is at the top of our requirements for our cows. We AI for 21 days and then turn out the bulls. Our goal is a 42-day calving season. Our calves are raised on their mother's milk and grass on mountain pastures. You won't find a creep feeder on our place. We don't tolerate bad dispositions, bad feet, or bad udders. The environment we run in is our best selection tool and the cream always rises to the top.

Because we participate in the Maternal Plus program, we received Functional Longevity EPDs on our cow herd and the sires we used. Much to our delight, our lead sire, TH Gunsmoke 255, came in with an EPD 10% above breed average, and the average EPD on our entire cow herd was also 10% above breed average. Cows that stick around and pay their own way are what we're all looking for. "Maternally Driven Genetics"

The bulls were weaned on September 29 this year and turned onto a grass meadow and fed a weaning pellet. On Nov. 29 we brought them to the lot and put them on a high roughage ration. Our goal is to have them developed enough to express their genetic potential and be ready to breed cows in the spring.

Once again, all the bulls will have a freeze brand. No more ear tag worries.

All our bulls are 100% guaranteed by Thousand Hills. If you have a problem with a bull, let us know. We will make it right.

The bulls are on feed here at home until the 8th of March. If you would like to look at the bulls at a more leisurely pace, we would be happy to have you stop by for a cup of coffee and a stroll through the bullpen.

If you are unable to attend the sale but would like to purchase, the sale will be on Northern Livestock. They will need you to preregister for the sale 24 hours in advance. We also have phones available on sale day if you prefer that. Let us know and we will make those arrangements.

This year we partnered with Ron Frye Marketing so if you want an unbiased opinion on the bulls, give Ron a call. (406) 600-7514

Videos of all the bulls are available at: [ThousandHillsAngus.com](https://www.ThousandHillsAngus.com)

Look forward to seeing you sale day or any other time,

The Van Dykens

Terms and Conditions

All cattle sell under the terms and conditions adopted by the
AmericanAngus Association. Each animal becomes the risk of
the purchases as soon as it is sold.
Thousand Hills reserves the right to retain 1/3 semen interest
on any of the bulls in the offering.

Delivery

We'll feed 'em till you need 'em, and delivery for free wherever
that may be.

Pathfinders

Sires and dams in pedigrees are indicated by the # mark.

Herd Health

Our herd is on a vaccination program, developed in
conjunction with Chuteside Vet Clinic. Bulls are vaccinated
at branding, at weaning, and again at fertility testing. Bull
have been vaccinated with Fusogard (footrot) and have been
boostered. In addition, all 3, 4, and 5 year old cows are tested
for Johnes. Questions about the herd health program can be
directed to Chuteside Vet Clinic at 406-285-3923.

Welcome to The Thousand Hills Angus Annual Bull Sale!

As a young regional manager for the American Angus Association, at the beginning of every sale, I would get up and talk to the crowd. So, I asked the powers that be at that time, what do you talk about? "Well, if the cattle are really good, talk about the cattle. If the people are very well-liked, talk about the people, and if neither is particularly true, talk about the Angus Industry." So, fast forward a few decades, and welcome to the Thousand Hills Angus Bull sale, where the cattle are really good, and the people are awesome! I really enjoy coming to the presale dinner the night before, the family, friends, and customers all coming together, and you are reminded of why we're in this business. Yes, it's the cattle business, but it's the people who make it special.

I marvel at this family, enduring the loss of their son, brother, husband, and father Andy. The decade-long cancer battle Halane has waged, with as much grace and courage as you could imagine. When I think of this family, two thoughts come to mind: faith and perseverance! At every curve in the road, they lean on their faith, persevere, and charge on. A great model for one's life, I'd say.

On the bull sale front, once again, they are coming to town with an honest, structurally sound set of bulls that are backed by generations of maternally-based females that are the cornerstone of their program. Bulls that have uniformity and the Thousand Hills look, which might be the greatest compliment a breeder can be paid. This year's offering is highlighted once again by the home-raised "Gun Smoke," a sire that is a top-flight sire and whose progeny carry the weight of a young man's Angus Legacy. You will like this sire group, and furthermore, I think you will be impressed with the entire offering.

As you prepare for this year's sale, please don't hesitate to reach out to me for any assistance you may need. Whether by phone, text, or email, I am here to ensure that your experience with Thousand Hills Angus is nothing short of exceptional.

Warmest regards,

MARKETING

A GUIDE TO EPDS

Expected Progeny Difference (EPD), is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the American Angus Association database. EPDs are expressed in units of measure for the trait, plus or minus.

PRODUCTION

Calving Ease Direct (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight EPD (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight EPD (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Yearling Weight EPD (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Scrotal Circumference EPD (SC), expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

MATERNAL

Maternal Milk EPD (Milk), is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

Heifer Pregnancy (HP), is a selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is the more favorable direction and the EPD is reported in percentage units.

\$VALUE INDEXES

Maternal Weaned Calf Value (\$M), an index, expressed in dollars per head, predicts profitability differences from conception to weaning with the underlying breeding objective assuming that individuals retain their own replacement females within herd and sell the rest of the cull female and all male progeny as feeder calves. The model assumes commercial producers will replace 25% of their breeding females in the first generation and 20% of their breeding females in each subsequent generation. Traits included are as follows: calving ease direct, calving ease maternal, weaning weight, milk, heifer pregnancy, docility, mature cow weight, claw set and foot angle.

Weaned Calf Value (\$W), an index, expressed in dollars per head, to predict profitability differences in progeny due to genetics from birth to weaning. The underlying objective being producers will retain 20% of the female progeny as replacements and sell the rest of the cull females and their male counterparts as feeder calves. Traits included are as follows (in no particular order): birth weight, weaning weight, milk, and mature cow weight.

CARCASS

Marbling EPD (Marb), expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area EPD (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

Fat Thickness EPD (Fat), expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

The top-selling bull in our 2019 sale, and a standout from the day he was born, out of Chisum 255, he's in the top 1% for \$M and 5% for \$W. Along with an impeccable foot and leg structure, his calves are thick with incredible hip and hind quarter. His elite dam, Windy 078 X Hero 2418, is the 3rd consecutive generation to achieve pathfinder status. She is the 8th straight generation to produce 7 or more calves.

His daughters are going to make outstanding cows.

We selected this Resource son as the second high seller in the 2020 Pine Coulee sale. We really liked the way he combined the Blackcap May cow with the Everelda Intense cow family into an excellent combination of muscle and mass that extends down through his hip and shoulder. He is easy-moving with a wide base and projects the masculine, timeless look of his sire. His dam recorded 3WR/113 and 2YR/112. He is in the top 1% of the Angus breed for Heifer Pregnancy.

Resilient was the high-selling bull in the Sitz 2019 Fall Sale, selling for \$160,000. Resilient progeny are very clean-fronted and have a very eye-appealing profile. Resilient sons have been very well received by buyers across the country. Resilient daughters are making angular, stylish feminine cows. Resilient traces back to a long line of superior cows in the Sitz program. We decided to use Resilient because of the cow power we feel he will bring to our herd and to our bull buyer's herds.

06 is a bull we held back for our own use from our 2021 sale. He had the look we liked and we thought this was a good way to get more of his dam's cow family genetics into our herd. His look and EPDs indicated he would work on heifers. We were not proven wrong. We used him on heifers for two years and didn't have to help even one heifer. His dam's cow family is shining through, his daughters are looking to make fantastic cows.

We were looking for a son of the Koupals Pathfinder bull. We liked the look of the daughters of a lot of the sires in his pedigree. We saw Trailboss at World West and thought we found what we were looking for. We used him pretty heavily on our heifers. He really worked as we did not help any of the heifers bred to him.

We had used AAR Really Windy 1205 several years ago and his daughters made some of our best cows. We selected Windy 8037 because of his strong maternal pedigree, combining the 1205 bull with SAV Bismarck 5682, along with his ease of calving. We have not been disappointed. He is as easy calving a bull as we've used, and his daughters flat-out do the job.

Heiken was the bull we selected as the high-selling bull in the JC Heiken and Sons 2023 sale. Sitz Incentive 704H is a bull we really liked the look of and his Pathfinder dam only piqued our interest. When we saw this pedigree with Logo on the bottom side going back to Justice, both Pathfinder sires, along with his Pathfinder grand dam, and his incredible birth to weaning EPD spread, we knew we wanted to add him to our program. We used him on our heifers both AI and natural, and have not had to give any heifers any assistance. We're really looking forward to getting his daughters in production.

WHY WE TEST WITH HD50K™ FROM ZOETIS

Powered by HD50K™ from Zoetis, our cattle sell with genomic-enhanced expected progeny differences (GE-EPDs).

With GE-EPDs, we're confident that customers like you can minimize risk in their investment — and enhance the productivity of your cattle.

The benefits of buying HD50K-tested bulls and heifers goes beyond added accuracy for the complete range of traits for more productive daughters and progeny. You'll know early on what that animal is likely to transmit to its offspring and potential for performance in the feedlot and on the rail. You can also match the HD50K tested sires you buy from us to replacement heifers — through GeneMax® Advantage™ — to make better-informed breeding and management decisions down the road.

Knowing an animal's potential. Continuous progress of your herd. That's why we test with HD50K.

A man wearing a white cowboy hat, a blue plaid shirt, and a dark vest stands with his back to the camera, leaning on a wooden fence. He is looking out over a large herd of black cows in a grassy field. In the background, there are rolling hills under a cloudy sky.

Andy Van Dyken

4/5/91 - 8/20/22

*Nothing about this walk
with Jesus is easy.*

By opening our hearts to Him,
we don't somehow bypass the trials of this world.
We don't get a free pass from heartache and disappointment.

And that often makes people wonder
what kind of God it is that we really serve.
But I'll tell you exactly what kind of God we serve.

We serve a God that gives a peace that passes
all understanding and a rest that no amount
of sleep could ever compare to.

We serve a God who loves you so much
that He wants every bit of your baggage.
Every bit of your brokenness. Every bit of our pain.
He wants to carry your load so that you don't have to.
He came so that you don't have to try to reach Him
through your own good works and self righteousness.

*He came so that when those trials come your way,
you will have a peace that makes those
who don't know Him want to know Him.*
